Good morning again Ms. Rao:

Thanks for taking my call earlier this morning. To reiterate: I am still waiting for State and City actions on the survey done by Towill, Shigeoka & Associates, Inc. on my property. The Towill survey was completed a couple of weeks ago, and is apparently making its rounds through governmental entities to get approval and shoreline certification. I'm trying to track the routing, but have not been able to get a good read as of yesterday.

Ty Miyabuchi of Engineering Dynamics Corp., the waste water engineering firm that I retained to do my work, has been helping me with the processing and approval requirements. I will let you know as soon as we get meaningful information on the survey status and other requirements. As we discussed, a certified shoreline survey is needed before planning and design of the septic system for my property can move further forward. Thanks for being patient and understanding.

Regards,
R. Kozuma
